

To whom it may concern,
I am an XM radio subscriber, and understand that the NAB has submitted petition 04-160, which would eliminate XM's traffic and weather broadcasts.

XM radio provides an outstanding service, and I pay monthly for the service. The programming selections are excellent, as are the traffic and weather broadcasts. The traffic and weather broadcasts offer far more detailed information about my daily commute, and are available when I need them, not every 10 minutes.

I respectfully urge you to reject NAB's petition. I should have the ability to choose a pay-based service, and the programming it provides. If the NAB is concerned with XM's success, they should improve the quality of their broadcasts, rather than try to eliminate a very worthy competitor.

Regards,

Brian Cummins
